KB P14139 Client receives error

Status: Verified

FACT(s) (Environment):

Progress 9.1B
Progress 9.1C
DG/UX Intel 4.20 M05

SYMPTOM(s):

 <routine>: <reason> (8004)

Database log error: sccheck_sql92_vis: scchk failed for filci (8004)

Unknown Field or Variable name - <field name>. (201)

Unknown Field or Variable name - notesfl. (201)

<program> Could not understand line <number>. (196)

Client error: Could not understand line 2. (196)

CHANGE

A field within a user-defined table was missing

FIX

1.   Run idxfix and let the idxfix utility correct any index corruption
it finds.
Syntax: proutil dbname -C idxfix
2.   Re-add the missing field using the Data Dictionary.
